Ripple

GIFT SHOP

MAROOCHYDORE STATE HIGH SCHOOL

Eco-Friendly, Youth-Driven Community Enterprise

About Us

The Ripple gift shop was launched in 2018 and is built from the work of a number of community programs at Maroochydore State High School including PEP, Betterman, Jigsaw, Might Minions and the Green Warriors.

All of these groups share the focus of innovatively using eco-friendly and recycled materials to create products that can be donated or sold to make our community a healthier place.

Not only is the journey enriching for the growth of young people, it also has a positive impact for the environment and the community.

Garden Tower

Starting at $20

It's a mortgage you can pay off in a couple minutes, with payments going to your local community, not the bank.

The two-story garden mansion — our Garden Tower or Fairy House is both a great indoor and outdoor garden accessory. They are made from eco-friendly materials with a unique laser cut door and window design. They are waterproofed with outdoor glue and marine grade varnish.

Beach Shack

$15

Go Green by the Sea: Tiny Beach Shacks, Big Sustainability!

Want something on the smaller side? Our beach shacks are a bright and colourful design featuring a laser cut sunflower or a wavy sea below.

Hobbit House

Starting at $20

So cute - buy one or become a real-estate tycoon and create your own village!

The Hobbit House is made from eco-friendly materials with a unique laser cut door design. It's held together with waterproof glue and sealed by marine grade varnish, so it's perfect for both indoor and outdoor locations.

Best of all, it was designed by youth looking to make a difference in their community.

Tree House

$15

Up above, resting high, great views, and plant delight!

The laser-cut tree house in a potted plant oasis invites us to step into a world where creativity knows no limits.

It isn't just an architectural marvel, it's a testament to the connection we share with the natural world.

Christmas Tree

$12

Where sustainability meets holiday splendor!

Our eco-friendly Christmas tree is more than a decorative piece; it's a reflection of a new era in holiday celebrations where conscious choices and innovation come together to spread joy and preserve our precious environment.

It seamlessly blends the rustic warmth of the laser-printed tree with the eco-conscious twist of recycled wood.

Pet Rock

$3

Doesn't need food- always behaves!

The pet that doesn't need food and always behaves.This cute rock is not just for you, you can buy one for the whole family.Their fun little smile and cuddly physique make them the perfect buddy.

Face Plant

$12

A face plant without the pain!

Our adorable mini planter boxes are made from eco-friendly materials with unique laser cutter designs.

Their healthy hairstyle has been carefully manicured with sunlight, water and a bit of love.

Junk Bots

$12

They can't do ballet, but they can dance a mean robot!

The Junk–Bot is an eco–friendly toy for children 3 years and up.

Made from mostly recycled timber, with laser cut designed pieces, gears, and accessories for a bit of creative bling.

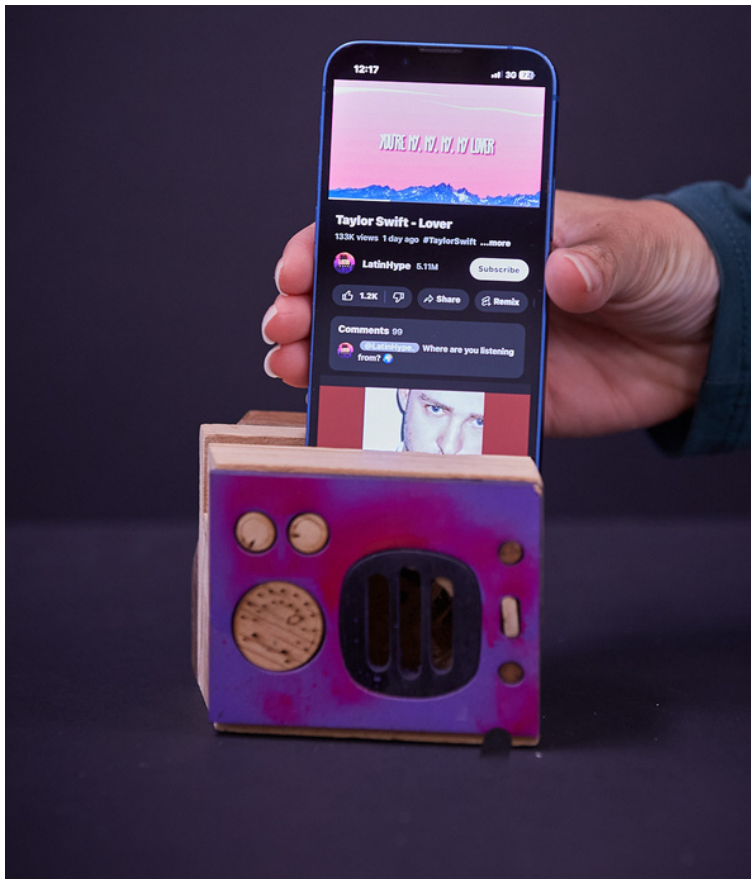

Fakie

$10

Trade in your kitchen bowl for a classy, passive amplifier!

The Fakie is anything but a fake speaker. Simply lay your phone on its side and listen for the increased amplification!

Great for the bedroom, kitchen or out camping. The best part .... it will never run out of battery. The Fakie is also made from recycled timber with our unique laser cut design speaker fronts.

Kokedamer & Mini Bloom

$10

Elevate your space, embrace serenity!

The hanging Kokedama featuring succulents or other greenery is a celebration of artistry and young people's ingenuity. The process of creating the Kokedamer and Mini Bloom brings a sense of peace and tranquility to the youth who make them which is transferred into the final product. We are certain it will bring an aura of calm and mindfulness to any space.

Eco-Vases

Starting at

$15

Rooted in elegance, a vase for your leafy companion!

Introducing our unique and sustainable masterpiece, the Eco-Vase, where nature meets innovation. This clever design seamlessly blends three diverse materials that showcase the roots of the plant and create an eye-catching centrepiece for your home.

We've incorporated reclaimed glass bottles along with a concrete top and a lasered base to give a modern industrial touch to materials that otherwise would have been diverted to landfill.
